Introducing

the most advanced power line safety products on the market today.

VOLTEK 2™

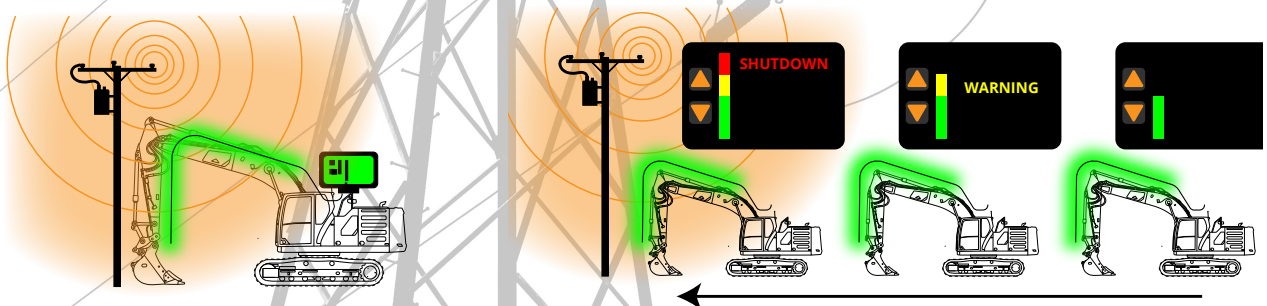

Power Line Warning & Range Limiting System

- Consistent and reliable detection of energized, above ground power lines (50-60Hz)
- Easy-to-use, intuitive display and progressive audio alerts maximizes usability without distracting the operator
- Auto-on feature turns system on upon equipment start up
- Auto-Max™ feature defaults to maximum sensitivity upon start up for maximum detection
- Adjustable sensitivity to accommodate every job site and situation
- Three progressive warning levels based upon sensitivity level settings
- Adjustable, progressive warning zone can be set to give ample warning before “SHUTDOWN”
- SHUTDOWN mode: Controls E-Stop or other systems on your equipment to stop movement or shutdown equipment when Voltek 2 indicates “SHUTDOWN” on display
- Durable ABS enclosure with IP67 rating for water and dust resistance
- Optional LTE connectivity (with SIM card and subscription plan) connects with Voltek Insight analytics and settings app to track and manage your systems
- Simple and quick installation

How it works:

The Voltek 2™ detects the E-field surrounding a power line. Audible and visual cues, as well as other optional features, are used to aid the operator in avoiding the detected power lines.

**ALWAYS ON.
ALWAYS ALERT.™**

Voltek Systems product line are designed and built with pride in the USA by United Safety Incorporated.

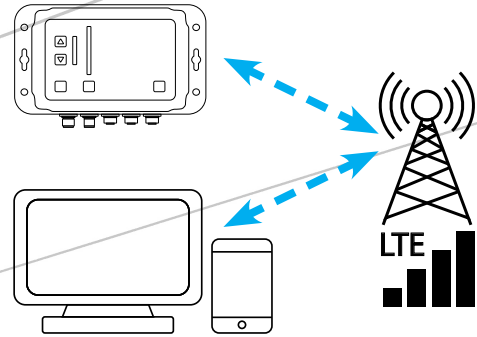

Our full line of products provides an unmatched level of safety around power lines.

INSIGHT™

System Notifications, Settings, & Analytics

- Receive real time notifications and alerts
- View data history and logged events
- Control system settings such as: power button disable feature, sensitivity lock, and more
- Keep track of systems by assigning job info, equipment info, photos, etc., to each product

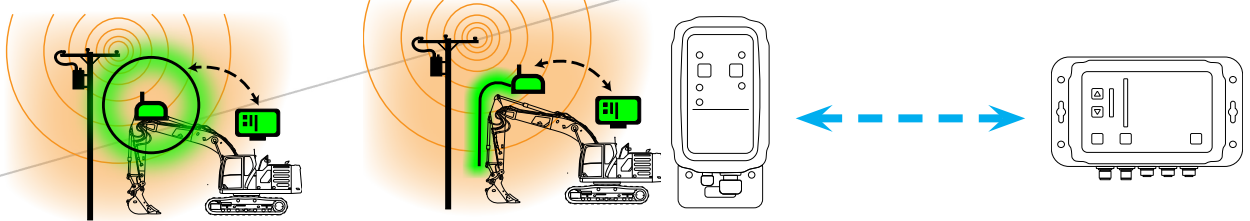

Be in full control with your systems with Insight™. Analytics, event and alert logs, notifications and system settings can be managed remotely from computer, tablet or phone. (Subscription Required)

WS™

Wireless Remote Sensor for Voltek 2

The WS provides additional flexibility by replacing the linear sensor wire directly connected to the Voltek 2 with a battery powered wireless sensor. The WS can be used with the built in sensor or used with a linear wire sensor wire to extend detection coverage.

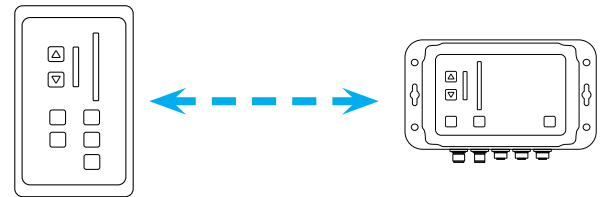

WS with on-board sensor WS with linear sensor wire

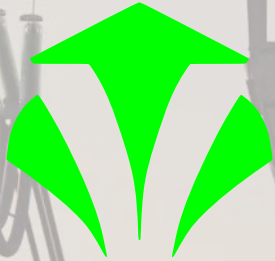

- 1000'+ Range
- High capacity battery for extended runtime
- COMING SOON - Solar panel charger to greatly extend time between charges (Optional)
- Powerful rare earth magnets secure sensor to equipment even in the most demanding situations
- Optional linear wire sensor for increased detection coverage

SPOTTER™

Remote Control & Alarm for Voltek 2

- View and control all systems settings remotely
- 1000'+ Range
- High capacity battery for extended runtime
- WARNING button activate siren on Voltek 2 for emergency situations
- SHUTDOWN button activates SHUTDOWN mode stopping equipment or activating E-Stop (Optional)
